Estimated Pricing

Engineering Services

- Provide access/setup inside tower as needed to allow proper inspection of structural components. Materials to be loaded through the courthouse interior.
- Provide an appropriately sized man-lift to allow proper inspection of all materials & conditions.
- Perform exploratory repair work, including removal of roof or cladding materials, core sample collection, and exposure of interior structural components as needed to allow proper assessment.
- Repair any openings or manipulated materials from the exploratory investigation as needed to maintain water-tight conditions.
- Provide field measurements, photo documentation, and structural analysis of the tower structure to determine framing, masonry, and other structural load-capacity & force stress resistances.
- Develop viable repair recommendations with the goal of salvaging and repairing the existing bell tower structure to the extent possible.
- Report with documented conclusions and evaluations, signed and sealed by a licensed professional structural engineer.
- Remote conference with client/parties as needed to review and discuss reports, conclusions, and repair recommendations.
- Clean up and remove all debris created by our work.

*The ROM for the above work: \$50,000.00

*Acceptance Total Investment (\$50,000.00) _____

(Owner Signature Required)

(Credit Cards (VISA/MC/AmEx) are accepted. A 4% convenience fee may apply.)

Date: _____
